

CLEARBROOK

10K JG Water Filters

FOR ICE MACHINES & DRINKING FOUNTAINS

10,000 Gallon Water Filter

Drink Fearlessly!

Clearbrook 10K Water Filter treats the water and enables clean, pure tasting ice and water for any application.

Clean, Safe Water

Clearbrook 10K Water Filter is made from a multi-blend of catalysts that remove the contaminants commonly found in municipal water so you can drink safely and utilize your local water source as intended.

- Tastes & Odors
- Chlorine and other Volatile Organic Compounds (VOC's)
- Lead and other Heavy Metals

Lasts for 10,000 gallons or 3 Years!

Unlike ordinary filters, which only last for months, Clearbrook Ice Machine Filters will last for a minimum of 3 years. Clearbrook can manufacture filters that only last 3 to 6 months but there is little value in shortening the lifetime of filters. Clearbrook wants you to install it and forget about it. Go do something else with your time and hard earned. Install it and forget about it...Clearbrook Ice Machine Filters lasts for 3 long years.

Easy to Install & Maintenance Free

The Clearbrook 10K Water Filter fits neatly behind or underneath your drinking fountain or ice machine. It comes with easy-to-understand installation instructions, everything you need to connect it to your water line, and takes only minutes to connect using John Guess, "JG" connections. Just cut the water line, insert the hose or tubing, and you're done! Clearbrook 10K Water Filter requires no maintenance.
